

CardScanofficePlus

CardScan for groups of up to five sharing two card scanners.

CardScan Office PLUS lets you share CardScan's powerful capabilities with your workgroup. Includes 2 Executive scanners and 5 software licenses.

CardScan multiple user bundles extend the capabilities of the world's most advanced card reader to fit your business needs perfectly. By buying the CardScan Office PLUS bundle, you save 15% over the separate-purchase price of two Executive scanners and five user licenses.

Bundle price Rs 33000/- (Rs 37950/- if purchased separately)

CardScan is a desktop device that quickly and accurately scans the printed information from business cards into the correct fields of a powerfully searchable, highly compatible electronic address book. In seconds, CardScan enters more cards than you could type in hours. Then, over 50 powerful software features help you search, sort, and use that contact information more efficiently.

With two scanners and five user licenses, you can share contacts with your entire team to create a contact management network.

Boost business productivity

Right from the start, CardScan Office PLUS saves you hours by capturing business cards directly into your computer. Without typing, you and your team build a database of your vital contacts, either in CardScan's address book, in Outlook, or in any other popular contact manager. Simply put, it's the world's fastest and most accurate business card reader.

Save time in ways you never imagined

Over 50 powerful software features help you and your entire team search, sort, and use contact information more efficiently. Save color images of your cards, both sides, plus all the information they hold, in searchable data form. Search by typing in just a few letters of anything you remember. Sort contacts into multiple groups for rapid access. Save to the Web for access anywhere and secure backup. There's even the AccuCard service to keep your contact records up to date.

Highly compatible to the way you work today

Stop retyping contacts from one program into another! CardScan Executive is compatible with every popular contact manager -- including Microsoft™ Outlook™, ACT!*, Lotus Notes, and many more. Sync it with your PDA or smart phone and take your contacts on the road. Save it to the Web with CardScan.net.

Sync CardScan Office PLUS with your PDA or smart phone

Easy to install, use, and upgrade

Take a quick look at CardScan's new user interface. It couldn't be simpler. In one view, you get the image of the card plus all the field-sorted contact information you need. It's easy to install, thanks to the plug and play install wizard. And when the time comes to upgrade, the path is fast and straight.

Fast, accurate, and reliable

Simply put, CardScan Executive is the fastest, most accurate business card reader available. Over 10 years in development have made it the most reliable, too.
