

“ If you’re ready to get organized, CardScan will be a valuable tool for you. ”

Walter S. Mossberg
The Wall Street Journal®

You spent years collecting them. Now turn every business card into an opportunity.

CardScan makes it easy to unlock the potential in every business card. Forget typing; CardScan reads business cards into your PC, sorting all their content into the fields of an easy-to-use address book. Then its powerful software helps you organize and use your contacts more effectively – turning every business card into an opportunity.

Here's what the press is saying about CardScan.

Entrepreneur.com

“ We used CardScan ... to track the thousands of cards we reviewed for our book. It's a great type of device for any master networker who needs to manage his or her business cards. ” – Ivan Misner, *Entrepreneur.com*

The New York Times

“ CardScan is a tool for making business cards more useful. ”
– Michel Marriott, *The New York Times*

COMPUTERWORLD

“ This is a business machine I can't imagine being without. Once you use it, I guarantee you'll be hooked. ” – Todd Weiss, *Computerworld*

WIRED

“ The mere thought of transcribing them [business cards] by hand makes me burst into tears; it would take several weekends. But with CardScan, I can digitize them in an hour or so. ” – *Wired*

With two great business card organizers which one is right for you?
