

Rear Projection SMART Board™ 4000i

Interactive Whiteboard

Experience ultra-crisp visuals

The 4000i is a stunning SXGA+ (1400 x 1050) rear-projection interactive whiteboard that displays brilliant, ultra-crisp visuals.

An ideal solution for command-and-control, simulation, research, design, engineering and other applications that require highly detailed visuals, the 4000i features a 2,500-lumen projector and 7,000-hour lamp.

Touch to control your information

Combining high-resolution images with touch control, the 4000i helps keep your audience engaged and facilitates collaboration. Now you can see, hear and touch your information.

Control your computer by touching the large display screen – your finger becomes the mouse. Write in digital ink over any software application, including moving video, and then save everything to a single file. Print, post or e-mail your notes so everyone can have a copy.

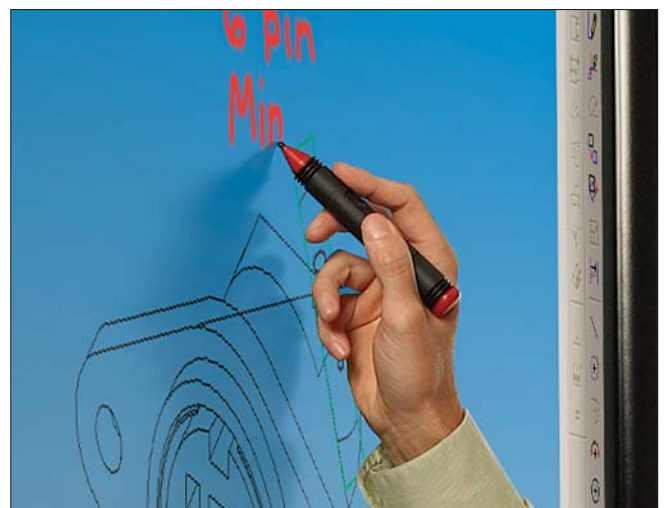

Manage your multimedia

The 4000i gives you the flexibility to connect and switch seamlessly between a laptop or other multimedia device. A built-in sound system gives you one-button volume control for all your multimedia equipment.

At a slim, 29" (74 cm) depth, the award-winning design of the 4000i is both attractive and practical. Projector controls on the front of the unit make start-up and operation simple and convenient, and lockable cabinet doors keep your equipment secure.

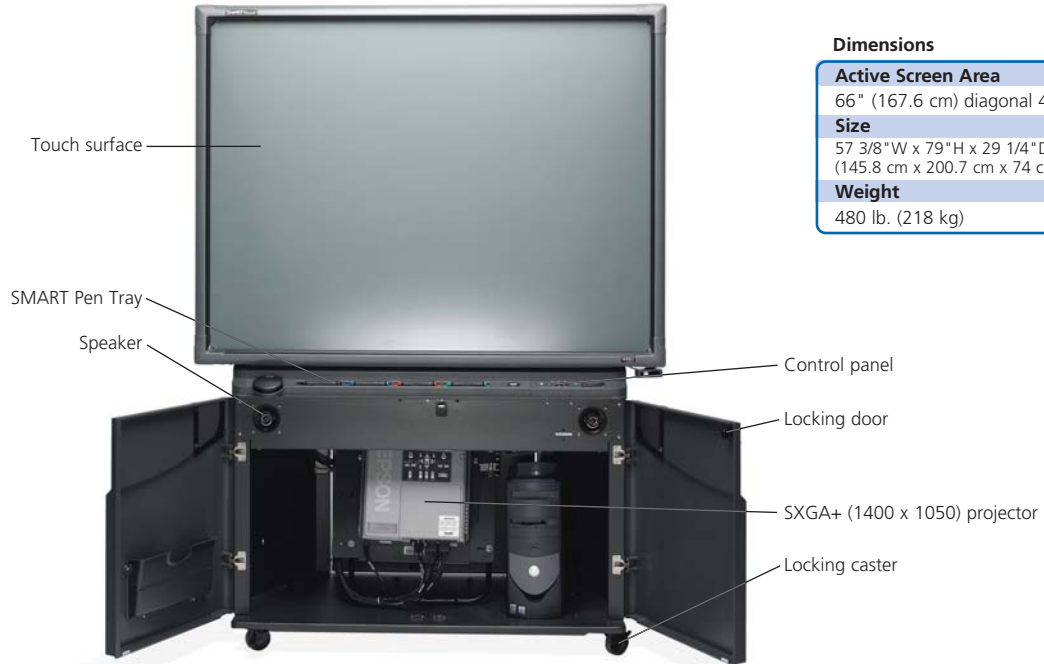

"The high-resolution display and large format provided by the 4000i make it a perfect medium for instructor presentation and student interaction with the simulated systems and components."

Phil Benson
Integrated Maintenance Training System Program Manager
Atlantis Systems International

Write in digital ink over any software application, and then save your notes.

Features

Dimensions	
Active Screen Area	66" (167.6 cm) diagonal 4:3 aspect ratio
Size	57 3/8"W x 79"H x 29 1/4"D (145.8 cm x 200.7 cm x 74 cm)
Weight	480 lb. (218 kg)

Note: Computer not included

Projection system – An SXGA+ (1400 x 1050) projector with short-throw lens, 2,500 lumens and 7,000-hour lamp ensures reliable operation.

Touch system – DViT™ (Digital Vision Touch) technology is the magic behind SMART's proprietary digital touch system. It lets you use your finger as a mouse and write in digital ink on the screen – without special tools or reduction in image quality. Cameras track contact on the screen.

SMART Pen Tray – Sensors detect when a pen or eraser tool is picked up from the SMART Pen Tray. Buttons on the tray also allow you to choose an on-screen keyboard or a right mouse click.

Space-saving cabinet – The 29 1/4" (74 cm) deep, tapered, mobile cabinet fits easily into corners.

Audio system – An integrated audio system includes stereo-amplified speakers controlled from the front of the unit.

SMART Screen – The diffusion screen reduces glare to deliver a high-contrast, uniform image with a wide viewing angle.

Control panel – Projector power, input sources and volume controls can be controlled at the front of the unit.

Laptop support – The shelf and connection cables attach to either side of the cabinet. An additional shelf is optional.

Locking casters – Four durable casters make the 4000i easy to reposition.

X-Port™ 20 switch – Using the control panel, switch between your computer and a connected laptop.

Connection panel – Connect a second projector, external audio system, network, printer or other serial device.

Wireless keyboard and holder – Use the standard Microsoft Windows operating system keyboard with built-in trackball.

Room-control module (optional) – This module integrates the 4000i control panel with a room-control system.

Warranty – Two-year limited equipment warranty on screen, cabinet and projector. 90-day warranty on the projector lamp. Projector and lamp warranty provided by Epson®.

SMART Board Software

- Write over applications, websites and videos
- Convert handwriting to text
- Record a presentation as a video and audio file
- Write and save notes in many third-party applications*
- Save in Notebook™ software
 - Share files across platforms
 - Drag objects between pages
 - Save file in various formats, including PDF and HTML
- Access functions easily with the Floating Tools palette, which can be customized and saved using a user profile
- Choose from 17 languages*
- Receive free software upgrades for life

* Windows® operating systems only

System Requirements Windows Operating Systems

Pentium® 150 MHz processor (Pentium II processor or later recommended) • 48 MB of RAM (128 MB recommended) • Windows NT® 4.0 (SP-6), Windows 98 operating system or later • 35 MB of free hard disk space for complete installation, 230 MB for complete installation with Gallery collections • Available powered USB or serial port

System Requirements Macintosh Computers

400 MHz processor (800 MHz or faster recommended) • 128 MB of RAM (256 MB recommended) • Mac OS® X version 10.1.5 or later (with Java version 1.3.1 update 1 or later) • 50 MB of free hard disk space for minimum installation, 115 MB for complete installation with Gallery collections • Available powered USB port

NOTE: SMART Board software is not compatible with versions 10.3.0, 10.3.1, 10.3.2 of the Mac OS X operating system. To use the handwriting recognition features, you must have Mac OS X version 10.3.3 or later.

Other versions of SMART Board software are available for UNIX® and Linux® systems, as well as for earlier Windows and Macintosh operating systems.
